Group 6

Definition :

Persons with Disabilities (singular Person with Disability, abbreviated as PwD) are people affected with one or more types of disability. The definition of a person with disability varies from place-to-place as various local/national laws define disability differently.

There are different things done for PwD : cecifoot, protesises, wheelchair basketball, and more !

In Quimper, we learnt more about wheelchair basket ball, vision troubles, and epileptics.

Disability and handicap are two different concepts. Disability refers to a condition caused by an accident, trauma, genetics, or disease which may limit a person's mobility, vision, speech, or cognitive function. Handicap refers to a physical or attitudinal constraint that is imposed upon a person, regardless of whether that person has a disability. In the legal sense, disability is the more commonly used term, with a definition that often differs from the one used by medical professionals.

Our fishing methods are not ecologic at all ; we fish a lot of fishes, killing them, to not eat them at the end because they are not "beatiful enough".

In Concarneau, we use "casiers" allowing us to choose the fishes we want to keep, not destroying habitats.

We went to Concarneau to learn about ecology!

We also learnt a lot about lobsters, a specie full of worries due to climate changes.

Lobsters are in dangers because of octopuses who arive more and more to Concarneau's water.

Octopuses hunt lobsters to eat, causing them to disapear, time after time.
